

Overview of Lavylites

These are all natural products made with the best natural ingredients and essential oils. It is said that there is a whole other set of “ingredients” added, which are best described as “vibrational medicine” or “medicine of the future”. I don’t really know the details of the technology, yet many people report amazing effects and results, thus I strongly believe there is something to it.

Important notice:

Subtle essences can positively support medical treatments and therapies and speed up the healing process. The use takes place under your own responsibility and does not substitute diagnosis or treatment from a doctor or alternative practitioner or restrict this.
